## Experience

---

**Sales Representative**, Verizon – Covington, WA November 2025 – April 2026

- Converted **75% of prospects** into customers through consultative selling, generating **110-130%** quota attainment while building strong customer relationships.
- Drove **70% of sales** by diagnosing technical issues and recommending tailored device and service plans, using data analysis to prevent repeat problems.
- Used sales data and diagnostics trends to prioritize solutions, increasing average transaction value and customer satisfaction with targeted recommendations.

**Associate Full Stack Developer**, Forge Tek Studios – Remote August 2025 – Current

- Built and deployed a production-ready React application for a digital-asset studio, integrating 3 external APIs to serve **5,000+ monthly active users**.
- Reduced system load by **80%** and page load times from 3.2s to 0.8s through caching optimization, increasing conversion rates by **35%**.
- Managed the full production release lifecycle including CI/CD pipelines, DNS configuration, and deployment, ensuring 99.9% uptime.

**Open-Source Intern**, CodeDay – Seattle, WA April 2025 – May 2025

- Facilitated weekly stand-ups and sprint retrospectives as Scrum Master, keeping the team aligned and achieving **100% on-time sprint delivery**.
- Collaborated with the open-source team to deliver 2 database integration MRs, with code reviewed and approved within 24 hours following project standards.
- Containerized development workflows using Docker, reducing environment-related bugs by **25%** and cutting setup time by **40%**.

## Projects

---

**Traffic Violation Detection System** - JavaScript, AWS Rekognition, S3, SQS, EventBridge, SES [github.com](https://github.com)

- Architected an event-driven serverless pipeline on AWS, integrating AI-powered image analysis and decoupled message processing.
- Automated end-to-end detection and notification workflow, reducing manual processing time by over **90%**.

**Resume Automation MCP** - LaTeX, YAML, GitHub Actions, LLM [github.com](https://github.com)

- Built an automated document generation pipeline using LLM-driven content selection, dynamically tailoring resumes to specific role requirements.
- Engineered CI/CD workflows using GitHub Actions to automate compilation and artifact management.

## Education

---

**Bellevue College** – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club
