Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Built and deployed a production-ready full-stack React application integrating **3 external APIs** (Steam, Fab Marketplace, Resend), handling **5,000+ monthly active users**.
- Optimized API ingestion and server-side caching, reducing data processing overhead by **80%** and lowering page load times from 3.2s to 0.8s.
- Automated CI/CD pipeline with GitHub Actions for daily deployments, registered DNS via Cloudflare, and implemented GA4 tracking across 15+ user behavior events.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Developed secure and scalable RESTful APIs with Express.js and Node.js to manage data flow and backend communication, using Tailwind CSS and Redux Toolkit on the frontend.
- Automated testing with Jest achieving **85% code coverage** and enforced code quality through ESLint, deployed via AWS Amplify CI/CD.
- Engineered a real-time, interaction-driven application using React and TensorFlow.js (MoveNet), processing live camera input with responsive UI feedback.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Guided **40+ students** in Object-Oriented Programming (Java) and SQL through weekly labs, tutoring sessions, and supplemental instruction.
- Taught relational database design and query optimization using MySQL Workbench, improving average project scores by **15%**.
- Coached students on JUnit testing and Javadoc documentation standards, raising assignment quality by **20%**.

Projects

Stock Ratio Tracker - Python, React, TypeScript github.com

- Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates via **RESTful API** integrations.
- Used JPMorgan Chase's Perspective library to generate live, interactive visualizations, translating complex data feeds into clear, actionable insights.
- Implemented automated unit tests and verified API responses using Postman-style testing workflows.

Resume Automation MCP - LaTeX, YAML, GitHub Actions github.com

- Developed an automated pipeline generating tailored documents from a versioned data store using **LLM-driven content selection and AI-assisted development**.
- Engineered a GitHub Actions CI/CD workflow to compile source files into production-ready PDFs upon every push.
- Built a modular data-injection system that dynamically selects and formats content based on role requirements, showcasing automation and prompt engineering.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL

Skills: React, Express.js, RESTful APIs, Node.js, Git, JSON, Postman, Jira, Agile/Scrum, DevSecOps

Tools: Jest, GitHub Actions, AWS Amplify
