Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025
• Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current
• Architected a modular React frontend with a serverless backend, leveraging custom hooks and context for efficient state management.
• Implemented dynamic data fetching and caching strategies for third-party APIs like Steam and Fab Marketplace to reduce latency.
• Reduced system load and data ingestion overhead by 80% through optimization of client-side rendering and synchronization logic.
• Owned the end-to-end release lifecycle, including build pipelines, environment configs, DNS, and hosting for a production-ready application.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025
• Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint.
• Developed secure and scalable RESTful APIs with Express.js and Node.js to manage data flow and backend communication.
• Integrated real-time machine learning models with React to enable low-latency, gesture-based user interaction directly in the browser.

Open-Source Intern, CodeDay – Seattle, WA April 2025 – May 2025
• Orchestrated Docker-based development environments to ensure consistent application behavior across local and staging stages.
• Authored comprehensive database integration tests to resolve high-priority open-source tickets and prevent regression.
• Drove project velocity as Scrum Master, meeting all client deadlines through proactive blocker removal and communication.

Projects

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com
• Architected an event-driven serverless pipeline on AWS, integrating S3, Rekognition, SQS, EventBridge, and SES for automated image processing.
• Implemented pattern matching with Regex to filter geographic plate data, ensuring accurate routing and notice generation.
• Reduced manual processing time by over 90% by automating the detection and notification workflow with cloud services.

Resume Automation MCP - LaTeX, YAML, GitHub Actions github.com
• Configured GitHub Actions workflows to automate LaTeX compilation and artifact management, ensuring consistent, environment-independent builds.
• Architected a document generation system using LaTeX and YAML, separating structured data storage from rendering and delivery.
• Reduced manual resume tailoring time by 90% by automating data selection and document formatting through an LLM-driven pipeline.

Skills

Languages: Python, Bash, Shell Scripting, JavaScript, TypeScript, Java, SQL, YAML, HTML/CSS

Skills: DevOps, CI/CD, Cloud Computing, RESTful APIs, SDLC, Networking Fundamentals, Automation, Agile/Scrum

Tools: Git, GitHub, GitHub Actions, Docker, Kubernetes, AWS Amplify, AWS S3, AWS SQS, AWS EventBridge, Linux, ESLint, Jest
