Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Architected a modular React frontend with custom hooks and context following SOLID principles, achieving 45% reduction in component re-renders and improving maintainability.
- Built and deployed production APIs integrating third-party services (Steam, Fab Marketplace, Resend), managing full release lifecycle with CI/CD, DNS, and hosting for 5,000+ MAU.
- Implemented intelligent server-side caching for API ingestion, reducing data processing overhead by 80% and lowering page load times from 3.2s to 0.8s.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Architected secure RESTful APIs with Express.js and Node.js using Redux Toolkit state management, supporting 200+ concurrent users with encrypted endpoints.
- Integrated real-time MoveNet ML models into a React application, processing 30 FPS live camera streams with sub-50ms latency for responsive gesture recognition.
- Built and maintained a CI/CD pipeline using AWS Amplify with automated Jest testing achieving 85% code coverage and ESLint enforcement for code quality.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Provided in-depth technical coaching to 40+ students on relational schema design, SQL query optimization, and Java unit testing patterns using JUnit.
- Facilitated workshops on MySQL Workbench for database visualization and management, improving lab completion rates by 25%.
- Elevated student proficiency in Javadoc documentation and JUnit testing, contributing to a 20% improvement in overall assignment quality.

Projects

Stock Ratio Tracker - Python, React, Typescript github.com

- Architected a data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency financial ratio updates for traders.
- Integrated JPMorgan Chase's Perspective library to generate interactive real-time visualizations of streaming financial data feeds.
- Implemented automated unit tests to ensure calculation correctness and system reliability.

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com

- Architected an event-driven serverless pipeline on AWS integrating Rekognition for image analysis and SQS for decoupled message processing.
- Engineered Regex-based plate filtering to route events through EventBridge, triggering automated SES email notifications for identified traffic offenders.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: Python, TypeScript, Java, JavaScript, SQL, Go

Skills: RESTful APIs, Full-stack Development, CI/CD, Automated Testing, Agile/Scrum, Problem Solving, Code Review

Tools: React, Next.js, Node.js, AWS Cloud Services, Docker, Git, Jira, Redux Toolkit
