Experience

Sales Representative, Verizon – Covington, WA

November 2025 – April 2026

- Resolved 70% of customer issues through technical device troubleshooting, using diagnostic tools and firmware checks to diagnose problems and recommend effective solutions.
- Explained complex technical concepts like signal strength, coverage maps, and device compatibility to customers, enabling informed decisions and technical confidence.
- Consistently surpassed monthly sales quotas by achieving 130% of targets through technical product expertise and consultative solution-selling.

Associate Full Stack Developer, Forge Tek Studios – Remote

August 2025 – Current

- Architected a modular React frontend with custom hooks and context, achieving 45% reduction in component re-renders while maintaining production-grade code quality.
- Implemented intelligent caching for third-party APIs, reducing data processing overhead by 80% and lowering page load times from 3.2s to 0.8s across 10+ product pages.
- Managed the full production release lifecycle including CI/CD, build pipelines, DNS, and hosting to deliver a stable application serving 5,000+ monthly active users.

Full Stack Developer Intern, METY Technology – Remote

September 2024 – June 2025

- Integrated real-time MoveNet ML models with React, processing 30 FPS live camera streams with sub-50ms latency for responsive gesture recognition in a medical AI application.
- Architected secure RESTful APIs with Express.js and Node.js using Redux Toolkit state management, supporting 200+ concurrent users with encrypted endpoints.
- Built and maintained a CI/CD pipeline using AWS Amplify with automated Jest testing achieving 85% code coverage and ESLint enforcement.

Projects

Traffic Violation Detection System - JavaScript, AWS Cloud Services

github.com

- Architected an event-driven serverless pipeline on AWS integrating Rekognition for image analysis and SQS for decoupled message processing.
- Engineered Regex-based plate filtering to route events through EventBridge, triggering automated SES email notifications for identified traffic offenders.

Stock Ratio Tracker - Python, React, Typescript

github.com

- Architected a data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates for traders.
- Integrated JPMorgan Chase's Perspective library to generate interactive real-time visualizations of financial data feeds.
- Implemented automated unit tests to ensure calculation correctness and system reliability.

Education

Bellevue College – BS in Computer Science – 3.6 GPA

September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: Python, TypeScript, Java, JavaScript, SQL, Go

Skills: Problem Diagnosis, Technical Troubleshooting, RESTful APIs, Full-stack Development, CI/CD, Cloud Infrastructure, Consultative Solutions

Tools: React, AWS Cloud Services, Node.js, Docker, Git, Jira, Linux
