Experience

Associate Full Stack Developer, Forge Tek Studios – Remote August 2025 – Current

- Built and deployed a production-ready TypeScript React website integrating 2 external APIs (Steam, Fab Marketplace), handling 5,000+ monthly active users with automatic scaling and real-time game/asset data.
- Architected a modular React frontend following SOLID principles with custom hooks and context, achieving 45% reduction in component re-renders and improving maintainability.
- Automated CI/CD pipeline with GitHub Actions for daily deployments to Vercel, registered DNS via Cloudflare, and implemented GA4 tracking across 15+ user behavior events.

Full Stack Developer Intern, METY Technology – Remote September 2024 – June 2025

- Engineered a real-time, interaction-driven application using React and TensorFlow.js (MoveNet), processing live camera input and rendering responsive UI feedback.
- Developed secure and scalable RESTful APIs with Express.js and Node.js to manage data flow and backend communication, using Tailwind CSS for styling and Redux Toolkit for state management.
- Built and maintained a CI/CD pipeline using AWS Amplify, with automated testing via Jest and code quality enforcement through ESLint.

Teaching Assistant, Bellevue College – Bellevue, WA April 2024 – December 2024

- Guided 40+ students in Java and SQL through weekly labs and 18 hours of tutoring support.
- Facilitated 6 workshops on MySQL Workbench for database visualization and management, improving lab completion rates by 25%.
- Boosted assignment quality by 20% with focused JUnit and Javadoc coaching, cutting rework and grading issues.

Projects

Stock Ratio Tracker - Python, React, TypeScript github.com

- Architected the data-flow pipeline connecting Python backend calculations to a live React dashboard, ensuring stable, low-latency ratio updates.
- Used JPMorgan Chase's open-source library called Perspective to generate a live graph that displays a data feed in a clear and visually appealing way for traders to monitor.
- Implemented automated unit tests to ensure correctness and reliability of ratio calculations.

Traffic Violation Detection System - JavaScript, AWS Cloud Services github.com

- Processed license plate images from S3 using AWS Rekognition, automating the identification of traffic offenders.
- Engineered Regex to identify California plates, routing events through SQS and EventBridge to trigger SES-based email notices.

Education

Bellevue College – BS in Computer Science – 3.6 GPA September 2021 – June 2025

- Award: Amazon Scholarship, Activities: Social Media Manager of Computer Science Club

Skills

Languages: Python, TypeScript, Java, JavaScript, C++, SQL, Go

Skills: RESTful APIs, Full-stack Development, CI/CD, Data Pipelines, SOLID, Clean Code

Tools: React, Node.js, Express.js, AWS, Docker, Git, MySQL, Redux Toolkit, TensorFlow.js
